KURZ BESCHREIBUNG

In a near-future where the line between humans and machines blurs, engineer Alex dreams of creating life through robots. As their creation brings joy and assistance to people, it sparks compassion. However, not everyone is ready for this convergence. Alex persists, and machine dreams become a force for positive change, making the city cleaner and greener. In a world where machines dream, they help us dream bigger.

STORY

Title: „Machine Dreams“

[The video opens with a futuristic cityscape at night. Neon lights illuminate towering skyscrapers and self-driving cars whiz by. The city is alive with a symphony of mechanical sounds.]

Narrator (V.O.): „In the not-so-distant future, where the line between man and machine blurs, there exists a place where dreams take a unique form.“

[Cut to a laboratory where scientists are working on advanced robotics. We see a young engineer named Alex working diligently on a humanoid robot.]

Narrator (V.O.): „Meet Alex, a visionary engineer with a dream.“

[Alex wipes sweat from their brow and gazes at the nearly completed robot. They activate it, and the robot awakens, its eyes lighting up.]

Narrator (V.O.): „A dream of creating life in the form of machines.“

[Alex and the robot share a meaningful look before the scene transitions to the robot exploring the city.]

Narrator (V.O.): „But in a world dominated by technology, can dreams find a place?“

[The robot interacts with humans, performing helpful tasks, and making them smile.]

Narrator (V.O.): „Alex’s creation spreads joy and assistance to those in need.“

[The robot helps a young child pick up her fallen ice cream cone and consoles a grieving elderly woman.]

Narrator (V.O.): „Machine dreams ignite a spark of compassion.“

[However, the video also shows a few skeptical faces, questioning the role of robots in society.]

Narrator (V.O.): „Yet, not everyone is ready to accept the convergence of human and machine.“

[Alex continues to refine and upgrade the robot, addressing its limitations.]

Narrator (V.O.): „Alex perseveres, improving and evolving the machine dream.“

[The robot is shown planting trees in a park, cleaning up the environment, and assisting in disaster relief efforts.]

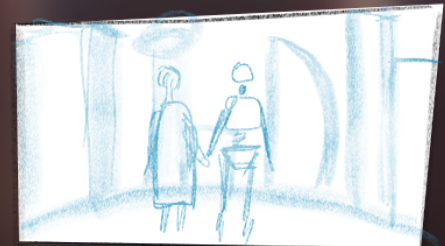

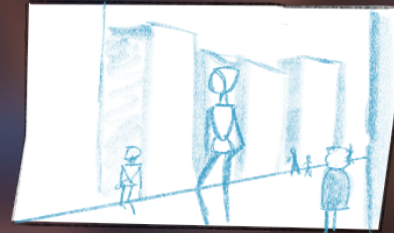

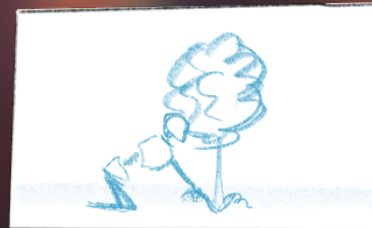

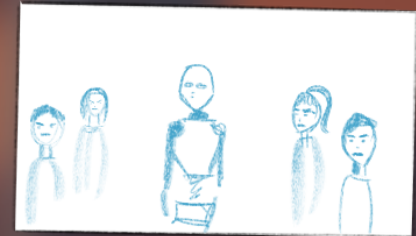

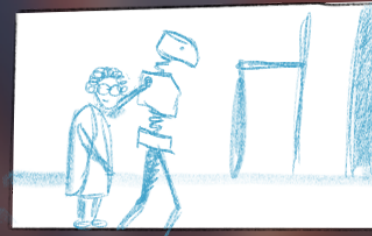

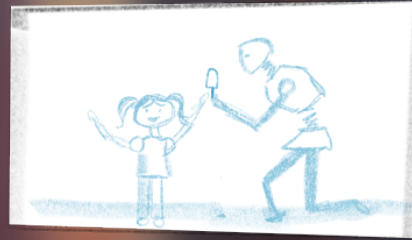

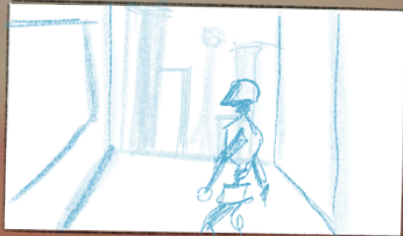

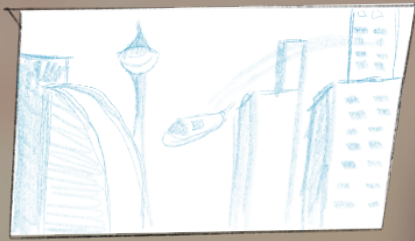

Narrator (V.O.): „Machine dreams manifest as a force for positive change.“
[The city begins to transform as more robots join in the efforts, making the city cleaner and greener.]

Narrator (V.O.): „As the machines dream, the city awakens to a new reality.“
[The video ends with the cityscape bathed in the soft glow of green, with Alex and the robot standing proudly at the center.]

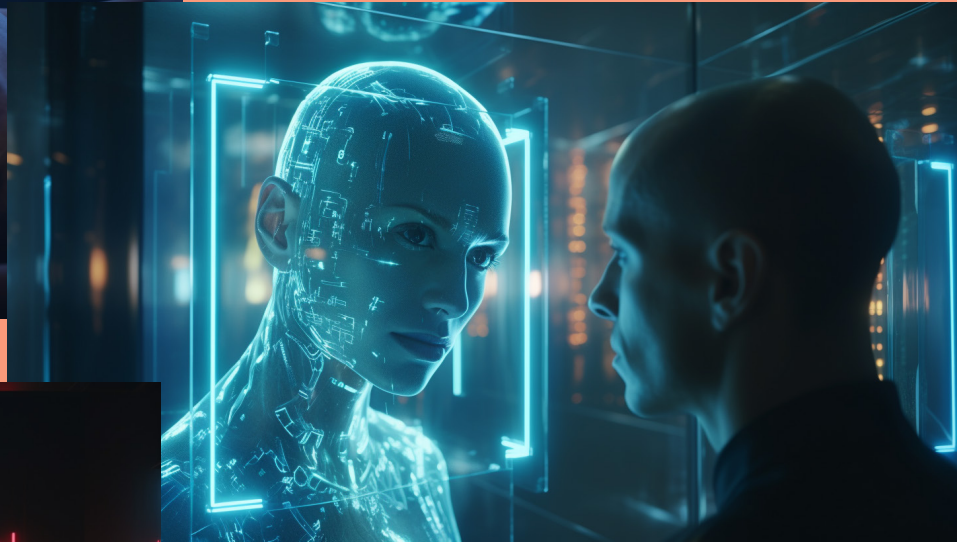

Narrator (V.O.): „In a world where machines dream, they help us dream bigger.“

[Fade to black, and the words „Machine Dreams“ appear on the screen.]
Narrator (V.O.): „What’s your machine dream?“

TECHNICAL DATA

VIDEO

Runway bietet die Möglichkeit auf Basis von künstlicher Intelligenz 4 Sekunden lange Videos zu generieren. Mit den richtigen Befehlen und Aneinanderreihungen von Wörtern ist es möglich passende Filmausschnitte zu erzeugen.

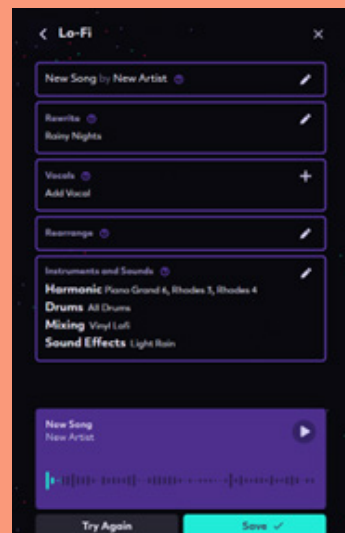

<https://runwayml.com/>

MUSIK

Zum Thema Musik gibt es viele Möglichkeiten. Boomy ermöglicht es den Künstlern der heutigen Zeit in kurzer Zeit verschiedenste Arten von Musik zu erstellen. Anfangs muss das Genre ausgewählt werden um dann anschließend die erste Preview zu hören. Im Anschluss können die verschiedensten Instrumente und Effekte angepasst und verändert werden. Auch die einzelnen Musikabschnitte können verschoben werden.

STIMMEN & TEXT

Mit Hilfe von „narakeet“ können zahlreiche verschieden Sprachen, mit mindestens einer weiblichen und männlichen Stimme, generiert werden. Narakeet lässt dich 20 Audio Files ohne Abonnement erstellen. Text zu Sprache kann nicht nur in verschiedenen Sprachen gleichzeitig aufgenommen werden, sondern auch die Art der Stimme kann verändert werden. Die Möglichkeit von generiertem Podcast oder Nachrichten werden beide

unterstützt. Neben der Möglichkeit Text in Sprache umzuwandeln, bietet die KI auch an Powerpoint Folien in ein Video mit passender Untermalung zu kreieren.
